## Flat Out Results.

The Work Ready™ Brandt UBE518 and UBE720 low-profile flatbed trailers deliver superior capacity to get your agricultural or landscape equipment where it's going, every single day. These rugged models work as hard as you do, while taking all the punishment you can dish out.

### ① Built to Last

Brandt trailers are purpose-built to maximize your productivity from dusk till dawn until the job gets done:

- A unified-frame design integrates the frame and deck into a single robust structure to minimize weak points and stress concentrations.
- Designed for optimal balancing with construction equipment, allowing for the most stable and secure load platform in the industry.
- Reliable design and long-lasting components reduce total cost of ownership.

### ② Easier to Operate

These trailers are designed for fast, effortless loading so you can start working sooner:

- Bolt-on key components are easily replaceable for fast maintenance, making this a fully serviceable design for maximum uptime.
- Expanded metal mesh accommodates equipment with ease, ensuring superior versatility.
- Standard tool tray located in the tongue of the trailer provides convenient storage and access to tools.

### ③ Safer

Safety is critical, so these models are designed with key features to maximize operator protection:

- Dependable 5200 lb axles (UBE518) and 7000 lb axles (UBE720) are standard to ensure positive hitch weight distribution and overall stability when hauling concentrated heavy payloads.
- Standard lower sidestep and bi-fold, full-width spring-assisted ramps with a knee support allow operators to work safely.
- Pressure treated pine/spruce decking provides better traction for the operator in wet and frozen conditions and reduces wear over time.

Powerful Value. **Delivered.**
